Designing for users with dyslexia

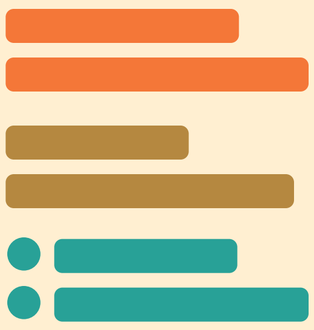
Do...

use images and diagrams to support text

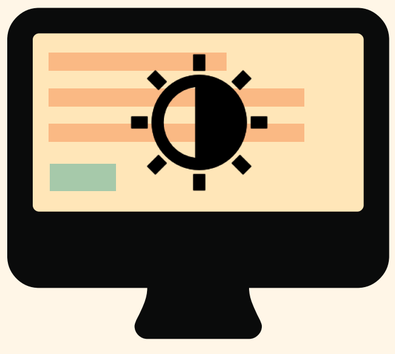
align text to the left and keep a consistent layout

consider producing materials in other formats (eg. audio or video)

keep content short, clear and simple (journalistic style)

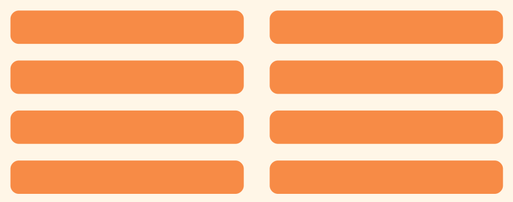


let users customise the contrast be-tween background and text



Don't...

produce blocks of text or text heavy pages

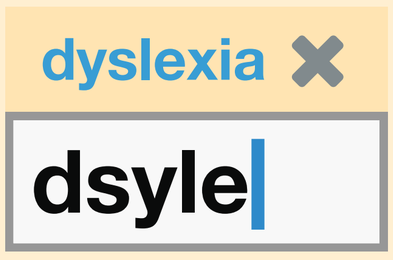


underline words, use italics or write in capitals

DON'T DO THIS

force users to rely on their memory - use prompts and inline text

require users to spell correctly - use autocorrect or provide suggestions



communicate complex information on one screen
