

# Designing for users with dyslexia

## Do...

use images and diagrams to support text

align text to the left and keep a consistent layout

consider producing materials in other formats (for example, audio or video)

keep content short, clear and simple

let users change the contrast between background and text

## Don't...

use large blocks of heavy text

underline words, use italics or write in capitals

***DON'T DO THIS***

force users to remember things from previous pages - give reminders and prompts

rely on accurate spelling - use autocorrect or provide suggestions

put too much information in one place
